

DISCLAIMER

A Womb With A View, LLC provides 3D/4D prenatal ultrasound services including videotaping and still photo images of your unborn baby. These images are provided for bonding and keepsake purposes only and are in no way to be interpreted as diagnostic or to provide assessment of the well being of the baby or mother. Sex determination will be provided at your request but is only the opinion of the technologist. A Womb With A View, LLC is not liable for any costs related to sex determination. Many factors affect our ability to obtain clear images of your baby during your ultrasound. A Womb With A View, LLC cannot guarantee the clarity of images due to factors beyond our control including, but not limited to fetal position and activity, gestational development and maternal tissues.

Ultrasound technology has been used widely over the last 35 years and to the best of our knowledge and belief, no studies have shown that 3D/4D ultrasound causes any harm to the mother or baby. If you have any questions or concerns related to the use of 3D/4D ultrasound, you should seek the advice of a licensed healthcare provider. It is required that you be under the care of a licensed physician or midwife prior to using our services and that he/she is the one best qualified to address questions and concerns about your pregnancy. The services of A Womb With A View, LLC in no way replace any diagnostic studies, tests or examination recommended by your physician.
